

**2016 ANNUAL FUGITIVE DUST  
CONTROL REPORT  
WESTON SURFACE IMPOUNDMENT**

**December 19, 2016**

**1.0 INTRODUCTION**

This annual fugitive dust control report has been prepared to meet the requirements of 40 CFR 257.80(c).

The Weston Surface Impoundments currently consists of the North Primary Impoundment, the South Primary Impoundment, the Northeast Secondary Impoundment and the Southeast Secondary Impoundment. All of the impoundment areas are operated utilizing similar processes.

**FUGITIVE DUST CONTROL MEASURES**

Fugitive dust control measures are described in Section 2.0 of the Fugitive Dust Control Plan, Weston Generating Station, dated October 13, 2015. Effectiveness of the Fugitive Dust Control Plan is evaluated during the weekly and annual inspections. A review of the weekly and annual inspections contained in the operating record was completed during the preparation of this annual fugitive dust control report and confirms that the fugitive dust control measures implemented at the Weston Generating Station are effective.

**2.0 CITIZEN COMPLAINTS**

The procedure for logging citizen complaints is described in Section 3.0 of the Fugitive Dust Control Plan, Weston Generating Station, dated October 13, 2015. There were no citizen complaints associated with the Weston Surface Impoundments that were logged during the period covered by this annual report.
