

Grade and staking certification form

Establishing the final grade on your property is required prior to the installation of Wisconsin Public Service underground facilities. To ensure public safety, state and national codes require us to install our facilities at certain depths. If relocation or repair of our facilities becomes necessary because of a grade change greater than 6 inches, you will be billed the full relocation or repair costs.

PROJECT DETAILS

Development name: _____

Municipality: _____

Work request #: _____

DEVELOPER SITE READY CERTIFICATION

I certify that I am the owner, or authorized representative of the owner, of the aforementioned development and that the ground elevations along the entire route in which Wisconsin Public Service underground facilities are to be installed is within 6 inches of final grade. I certify the grade was confirmed by a surveying/engineering firm and that easement corridors, right of way lines and lot corners have been clearly marked and staked by said firm along the entire installation route. I agree that I, or the owner of the property, will pay for any relocation or repair costs incurred by Wisconsin Public Service due to grade change in excess of 6 inches.
